

# Healthcare Innovation Program

September 22, 2023

## ***Healthcare Innovation Program***

Healing is all about the connections we make with people. You are an expert of transformation and a brilliant example of what is possible. You just might not know it yet! In this program, you will become masters of communication. You will learn to stand in your power so that you can hold space for others! Compassion, creative freedom and intuition are the center of finding one's path.

Every student will have their own reasons for doing this program. Whatever your passion is we can teach you how to follow it. The thing that sets your heart on fire and makes steam come out of your ears! It is usually connected to your trauma, so that's why building a safe place for you to learn from your experience is our priority.

To be a great healer, you must apply everything you know to yourself, this is more of a way of life than an education for a job. You will be the new leaders and role models for a better society. True leaders do not seek power they are given trust. Great teachers do not need authority they understand they are always learning. These are your true skills, they must be lived and nourished.

It is not about changing who you are, it is becoming who you were always meant to be. Only then can you get on with doing what you were born to do! Only your heart can tell you what that is.

What you can do during this education is limitless. This is like elite navy seal training for compassion. Some of our students will stay and work with us and others will go out and start up their own social change projects with our full support.

Perhaps one of the most important contributions you will be able to make with this program is to empower, motivate, and inspire yourself. The world becomes a better place one person at a time. All it takes is willingness and belief.

Let's go! Time to save the world!

*Patience*

# Intentions are Everything!

To provide a safe place for someone to find clarity and perspective is always our intention in healing. Let them see the potential in how to work with their own energy and the energy around them differently. Plant seeds. Give the gift of a non-resistant thought. This gives lasting results and real transformation. YOU can not do anything for another person.

ALL HEALING IS SELF HEALING

Sometimes we need help to get to the place where healing can happen. Safety! It is only through seeing how your world view has been altered from your own trauma that you may be able to accurately understand how someone else's world view has been affected by their trauma. We must have a common reality that we can work from. This will require no extra energy from you if you are in your power. We simply hold space. People do not need to be told what to do. We do not fix their problems. We hold space so they can find the courage and strength to do what they know they need to do.

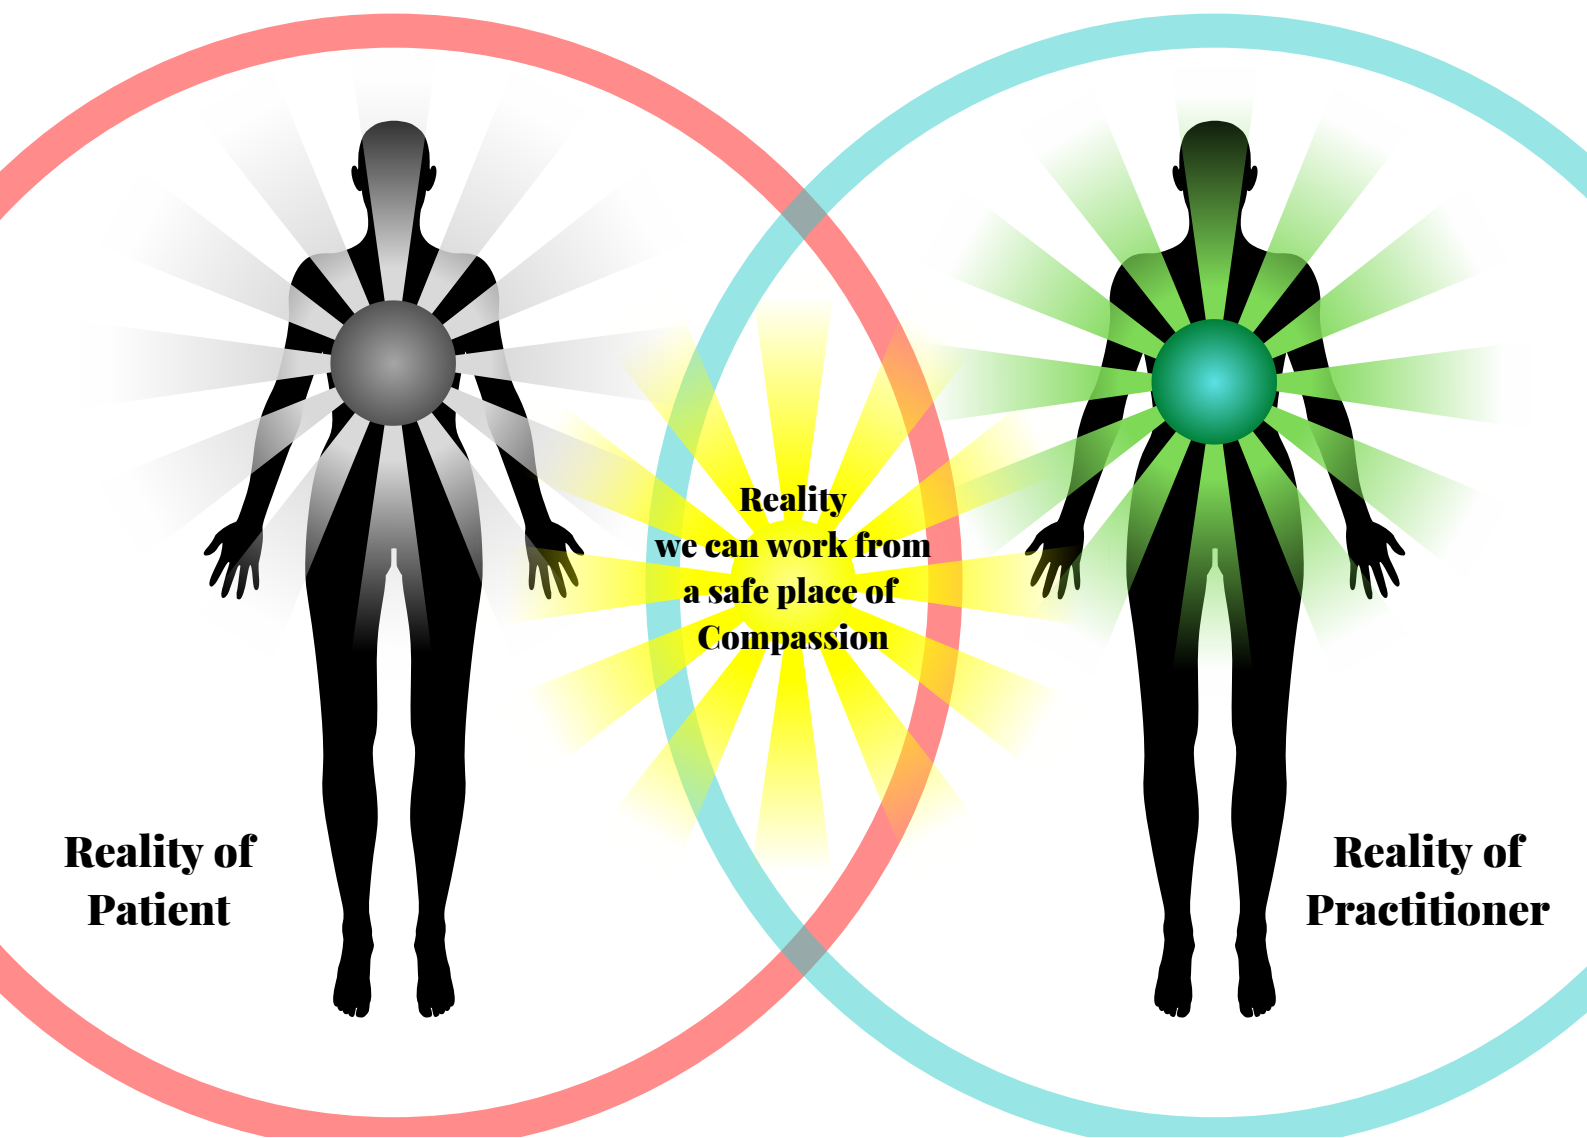

Compassionate communication, a safe environment, replenish what has been lost, rest, regenerate, & empower for engagement to transform.

ALWAYS get permission

NEVER do a reading to prove that you can!

NEVER go in looking for something to be wrong!

You are not writing this story. You are listening to it!

## HEAL YOURSELF

### The Art of Healing Term I

- 22 hrs Personalised treatment to heal yourself
- 4 weekend classes (sat & sun) 48 hrs
- 30 hrs clinical experience
- 16 Workshops
- Online course material with quizzes, videos & tips & tools

The educational training programs offered by the Institute were created in direct response to the urgent need for an empowered public health initiative with prevention and healing in focus. Rapidly changing needs and an overwhelming demand on health care require new resources. We empower individuals to create the resources that are missing in their lives and in the community.

# THE 4 REQUIREMENTS FOR HEALTH

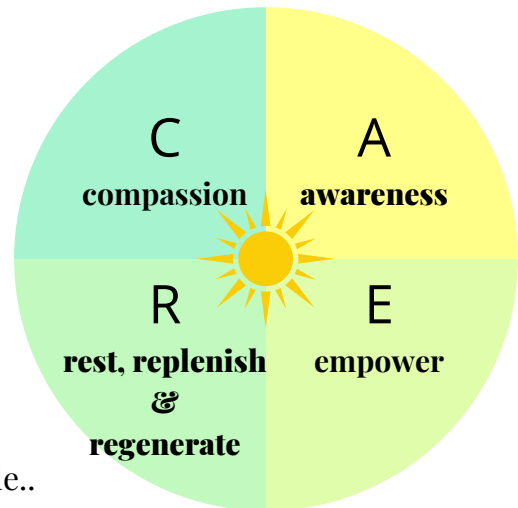

- Communication
- Safe Place
- Nourishment
- Engagement

At 7 Dragons Institute 4 Healthcare Innovation, it is our philosophy that to heal, is to make or become whole.. To us, Healthcare is about the efforts made to maintain and restore physical, mental, and emotional well-being.

The 7 Dragons method give us a simple formula for health and a meaningful effective method of delivery. Communication, a safe environment, nutrients, and engagement are the four requirements for health.

We believe the key to healing is in understanding the healing process and finding creative and empowering new ways to make sure these fundamental requirements are met. Through Compassion, Awareness, Rest, Replenishment of Resources, Regeneration, and Empowerment we can more effectively restore health and wellbeing while preventing disease. Our services address the physical, emotional, spiritual, and social aspects of each individual based on their experience. We are advocates and teachers of the natural healing process. Providing a safe place for healing to occur.

- Compassion. People need to be seen, they need to be heard, and their experience must be at the center. Only with compassion and trust can we establish healthy Communication .  
We cannot forget the communication between the cells and organs within the physical body as well as communication with the self.
- Awareness. Become aware of environment and acknowledge and accept circumstances. Create a Safe environment for healing to take place.
- Rest, Replenish & Regenerate. Nourishment for the physical, emotional, spiritual and social aspects of life. Replenish what has been lost. Rest and allow time for regeneration.
- Empowerment Engage to create change. Transformation of trauma to action and service in the community. This is also true to the cellular level in your physical body.
